

DSA 100 — LeetCode Roadmap

Beginner-friendly progression • Arrays → Strings → Linked List → Stack/Queue → Trees → Graphs → DP

Total	Easy	Medium	Hard	Solutions
100	50	30	20	C++ + Java

Recommended routine: Pehle 30–45 min khud attempt karo → phir daily online session mein discuss karo → solution ko C++ aur Java dono mein implement karo → next day short revision.

1. Arrays

#	LeetCode Problem	Difficulty	Done
1	Two Sum	Easy	■
2	Best Time to Buy and Sell Stock	Easy	■
3	Contains Duplicate	Easy	■
4	Maximum Subarray	Easy	■
5	Plus One	Easy	■
6	Remove Duplicates from Sorted Array	Easy	■
7	Remove Element	Easy	■
8	Merge Sorted Array	Easy	■
9	Intersection of Two Arrays	Easy	■
10	Move Zeroes	Easy	■
11	Majority Element	Easy	■
12	Missing Number	Easy	■
13	Single Number	Easy	■
14	Find Pivot Index	Easy	■
15	Running Sum of 1d Array	Easy	■
16	Merge Intervals	Medium	■
17	3Sum	Medium	■
18	Product of Array Except Self	Medium	■
19	Maximum Product Subarray	Medium	■
20	Subarray Sum Equals K	Medium	■
21	Container With Most Water	Medium	■
22	Sliding Window Median	Hard	■
23	Trapping Rain Water	Hard	■
24	First Missing Positive	Hard	■
25	Median of Two Sorted Arrays	Hard	■

2. Strings

#	LeetCode Problem	Difficulty	Done
26	Valid Anagram	Easy	■
27	Valid Palindrome	Easy	■
28	Longest Common Prefix	Easy	■
29	Roman to Integer	Easy	■
30	Length of Last Word	Easy	■
31	Reverse String	Easy	■
32	Is Subsequence	Easy	■
33	First Unique Character in a String	Easy	■
34	Longest Substring Without Repeating Characters	Medium	■
35	Group Anagrams	Medium	■
36	Longest Palindromic Substring	Medium	■
37	String to Integer (atoi)	Medium	■
38	Minimum Window Substring	Hard	■
39	Regular Expression Matching	Hard	■
40	Wildcard Matching	Hard	■

3. Linked List

#	LeetCode Problem	Difficulty	Done
41	Reverse Linked List	Easy	■
42	Merge Two Sorted Lists	Easy	■
43	Linked List Cycle	Easy	■
44	Middle of the Linked List	Easy	■
45	Remove Linked List Elements	Easy	■
46	Palindrome Linked List	Easy	■
47	Intersection of Two Linked Lists	Easy	■
48	Remove Duplicates from Sorted List	Easy	■
49	Remove Nth Node From End of List	Medium	■
50	Add Two Numbers	Medium	■
51	Reorder List	Medium	■
52	Copy List with Random Pointer	Medium	■
53	Reverse Nodes in k-Group	Hard	■
54	Merge k Sorted Lists	Hard	■
55	LRU Cache	Hard	■

4. Stack / Queue

#	LeetCode Problem	Difficulty	Done
56	Implement Queue using Stacks	Easy	■
57	Implement Stack using Queues	Easy	■
58	Next Greater Element I	Easy	■
59	Baseball Game	Easy	■
60	Backspace String Compare	Easy	■
61	Valid Parentheses	Easy	■
62	Min Stack	Medium	■
63	Evaluate Reverse Polish Notation	Medium	■
64	Daily Temperatures	Medium	■
65	Simplify Path	Medium	■
66	Asteroid Collision	Hard	■
67	Largest Rectangle in Histogram	Hard	■
68	Sliding Window Maximum	Hard	■

5. Trees

#	LeetCode Problem	Difficulty	Done
69	Maximum Depth of Binary Tree	Easy	■
70	Same Tree	Easy	■
71	Invert Binary Tree	Easy	■
72	Symmetric Tree	Easy	■
73	Binary Tree Inorder Traversal	Easy	■
74	Binary Tree Preorder Traversal	Easy	■
75	Binary Tree Postorder Traversal	Easy	■
76	Search in a Binary Search Tree	Easy	■
77	Binary Tree Level Order Traversal	Medium	■
78	Validate Binary Search Tree	Medium	■
79	Lowest Common Ancestor of a Binary Tree	Medium	■
80	Kth Smallest Element in a BST	Medium	■
81	Binary Tree Maximum Path Sum	Hard	■
82	Serialize and Deserialize Binary Tree	Hard	■

6. Graphs

#	LeetCode Problem	Difficulty	Done
83	Find if Path Exists in Graph	Easy	■
84	Flood Fill	Easy	■
85	Number of Islands	Medium	■

#	LeetCode Problem	Difficulty	Done
86	Clone Graph	Medium	■
87	Rotting Oranges	Medium	■
88	Course Schedule	Medium	■
89	Pacific Atlantic Water Flow	Medium	■
90	Word Ladder	Hard	■
91	Alien Dictionary	Hard	■
92	Reconstruct Itinerary	Hard	■

7. Dynamic Programming

#	LeetCode Problem	Difficulty	Done
93	Climbing Stairs	Easy	■
94	Min Cost Climbing Stairs	Easy	■
95	House Robber	Easy	■
96	Coin Change	Medium	■
97	Longest Increasing Subsequence	Medium	■
98	Partition Equal Subset Sum	Medium	■
99	Edit Distance	Hard	■
100	Burst Balloons	Hard	■

Language: C++ + Java **Target:** DSA fundamentals + common interview patterns. Difficulty is arranged progressively, with harder patterns concentrated toward the later stages.
